PROJECTS

Weather Application (April 2023)

Html5 | CSS3 | JavaScript | Reactjs | API

Weather app is used to comfortably check real time weather status.

Open Weather map API is used to retrieve weather data as per the city names entered by the user

Login Form Authentication (May 2023)

Html5 | Css3 | Bootstrap | Toastify | Javascript | Reactjs | JSON | Rest API

Validate the User has entered all required field and saves in db.json

Used Custom hook that wraps custom logic. Using **session storage** to save data. **Rest API** for access and manipulate resources on remote servers through **HTTP** methods like **POST** .

Certification

Completed **Full Stack with Python** course from Besant Technologies

PERSONAL INFORMATION:

Studied for Government Exams

2021(Sept)-2022(Nov)

As it was my parents decision to go for government job, I personally had interest in private jobs So in order not to disappoint them I tried but unfortunately I didn't succeed So they said to follow my dream in private sector

Besant Technologies:

2022(Dec)-2023(May)

Full stack with Python course
